Wax Paper--1 lb. paper rolls, good for school lunches	30c

Extra Special

A few boxes of orchard run McIntosh Apples at **\$1.00**

HALLIDAY & LAUT

New Addition to Anglican Church Dedicated

A large congregation gathered Thursday evening to take part in the dedication of the chancel and new addition to the Anglican church.

Evensong was sung by the Rev. Canon Gale of St. John's, Calgary, while the Bishop took the dedication part of the ceremony in his usual clear voice. The Dean preached a very searching sermon. There were also present, Rev. Chapman of Lacombe, representing the Rural Deanery, Rev. Atwood of St. Augustine Ogden, Rev. Morgan of St. Michaels, Calgary, and the Rev. Rowe of St. Barnabas.

Both the Bishop and the Dean complimented the congregation on their progressive step forward.

Among the clergy, Canon Gale was present at the dedication of the original building 24 years ago, and in the congregation were Mr. and Mrs. Ivor Lewis, and Mrs. Wm. Urquhart who were also present at the opening of the former building. At the conclusion of the ceremony, the Bishop, Dean and Clergy were entertained by Mr. and Mrs. Lewis, Mrs. Currie and Mrs. McClelland assisting.

The Bold Bad Thief

On Sunday night a kind hearted gentleman relieved Archie McEadyen of a nice veal calf, and butchered it in the ditch on No. 1 high way in front of Mr. McEadyen's house. The head and entrails were left in the ditch where the animal had been slaughtered. Now, can you beat that for guts?

Want Improvements to Station Grounds

The B. of T. and Village Council have written to the C.P.R. officials urging them to make some much needed improvements to the station grounds. Now that we have the new station, the old tumble down fence, dead trees and weeds, look very much out of place.

It is possible that the C. P. R. have in mind these improvements, at the same time a gentle reminder from the Board of Trade and Village Council can do no harm.

It should also be pointed out to the C.P.R. that the cinder walk from the station to the main street needs rebuilding. As this is the only walk by which you can get to and from the station, it should be rebuilt.

Local News

The Ouellet Christmas concert and dance will be held on Dec. 22.

The play advertised for Dec. 1st, in connection with the United Church has been postponed until early in January.

Merrick Thomas and family are moving to the Walter Hurt farm for the winter.

Ed. Clark and family have moved into the Thomas residence.

Rev. Longmire is progressing favorably following his operation of last week at the General Hospital, Calgary.

Following a week of new warm weather the snow has all disappeared. Several farmers in the district are plowing.

A Government telephone repair gang arrived here the first of the week and are putting up the telephone poles east of town that went down during the heavy snow and sleet storm of two week's ago.

The Douglas Ranch sold 130 head of dry cows to Burs Co. Calgary on Monday. This was an exceptional bunch of fat cattle.

The three pure bred calves reported by Frank Ruddy as stolen last week, were thoughtfully returned, at any rate Frank found them in a vacant building on his farm.

Mr. and Mrs. Chas. Ferguson, who were recently married, entertained their many friends and neighbors at a very enjoyable dance in the East Community Hall on Wednesday evening.

R. M. McCool, M.L.A. has accepted an invitation to address a public meeting at Beiseker on Nov. 22. Mr. Howson, Liberal leader, spoke at a recent meeting in Beiseker, and the citizens there are anxious to hear the political questions discussed by both parties.

Remembrance Day Observed

There was a very large attendance at the Armistice service held in the Church of Ascension on Saturday 11th Nov. The church looked beautiful and was tastefully decorated with flags and poppies.

Rev. A. C. Currie gave an interesting address on "The Symbol of the Poppy." Mrs. A. Montgomery sang "In Flanders Fields" very sweetly, while the choir sang in their usual accomplished manner "Soon the Sun is Sinking." A number of well known hymns were sung.

The Comrades were led to the church by a party of Sea Cadets and Petty Officer Ward from Calgary, playing the drums and bugles. The Last Post was sounded towards the end of the service, and it is safe to say it has never been played better in Crossfield.

After the service the Veterans and the Sea Cadets were taken to the cemetery to place poppies on the graves of their fallen Comrades, when the bugles were again sounded.

Mr. and Mrs. Mossop entertained at tea for those Vets. and their friends from out of town. Mrs. Ivor Lewis also entertained after the service.

Want Wednesday Half-Holiday Continued

A meeting of business men and clerks was held in the Fire Hall on Wednesday afternoon to discuss the question of the Wednesday half holiday. Sixteen persons attended.

Chairman and Secretary were elected.

Moved and seconded, that stores continue to close on Wednesday afternoon. Carried unanimously.

It was moved and carried unanimously, that the Council be asked to continue the 1932-33 half-holiday permanently.

It was moved and carried that, each merchant display a card permanently, to the effect that the store is closed on Wednesday afternoon.

Armistice Dance Successful

The annual Armistice dance held on Friday evening, Nov. 10, was thoroughly enjoyed by a large crowd, although the music, supplied by a Calgary orchestra, were at times, very punk. Members of the Legion and their wives served a very bounteous lunch at midnight. Jimmie McClelland held ticket no. 298 in the draw and was therefore the winner of the ten dollars in gold.

Notice re Discount on Village Taxes

Ratepayers of the Village of Crossfield are reminded that current municipal taxes for the year 1933, if paid on or before December 1st, 1933, are subject to a discount of ten per cent. This is a matter that is well worth taking advantage of and ratepayers should make arrangements accordingly.

Drink, Eat and be Merry

For Tomorrow You May Cry

It is true that possibly there was too much hootch in evidence at the Armistice dance on Friday night for a public function of this kind, although the large crowd were very jolly and appeared to be enjoying themselves to the utmost.

It was also noticeable that those making the most noise were not returned men at all. It is hard indeed to regulate an affair of this kind to suit everybody--especially those who do not attend dances, but who pass away their idle hours in gossiping.

Dr. Stanley, M. P. and Hugh Farthing, M.L.A. of Calgary, were visitors in town on Thursday evening of last week and held a huddle with a few Conservatives of the town, of which we have received no official report yet.

Chiselling

The N.R.A. campaign in the United States. If it has not added a new word to the vocabulary of the American people, has at least given a popular and significant meaning to an old word, and has brought that word into every day conversation. It is being used by everybody from President Roosevelt to the man on the street corner. The word is "chisel." "Chiselled." "Chiselling." It has become an accepted slang phrase, and like so many slang words and phrases it is very appropriate for the use to which it is being put.

In its usually accepted meaning, "chisel" is the name of an instrument of iron or steel used in carpentry, joinery, cabinet work, masonry, sculpture, etc., for paring, hewing, or gouging. In its slang adaptation it is applied to mean "to cut close," as in a bargain; in a word, to cheat.

Thus, under the now almost universal N.R.A. codes in the United States providing for shortening hours of labor, increasing wages, controlling sales prices, regulating production, the word is being applied to the individual or the concern which by any devious means or another seeks to pare off a little here or there from the spirit or the agreement into which they have entered, or to gouge a little out of their workmen or their customers. Such individuals or concerns are known as "chisellers," and the tactics employed by them as "chiselling." They are apt and expressive words when so used.

One is inclined to extend the application of these terms beyond the N.R.A. in the United States, and apply them generally to the attitude of many people in all lands and all classes and conditions to life itself, its manifold duties and responsibilities.

There is the boy and girl in school whose education is being provided for them possibly at great expense and very real sacrifices by their parents but who, instead of applying themselves diligently to their studies for the few brief years of school training, are just passing the way through, deriving only sufficient time and thought to their work to "get by" but not really and earnestly striving to make the most of their opportunities. They are responsible for waste of all round—waste of money and of personal sacrifice by their parents, waste of their own time and opportunities, waste of the teacher's time and effort. They are chiselling something out of their own lives which, to their lasting regret in later years, they can never replace.

There is the teacher who, instead of giving of their very best to their pupils, and taking a keen interest in their advancement, are content to just "get by" their inspector and retain their positions by having a sufficiently satisfactory number of "passes" by their pupils irrespective of the fact as to whether or not real instruction has been given to them.

There are the "clock watching" employees, clerks, stenographers, workmen in all trades, laborers in every field, who, instead of striving to give a maximum of efficient service in return for the wages paid to them, are time-serverers, doing just as little as they can, gouging their employers of time and effort which rightfully belongs to them. On the other hand, there is the employer who in one way or another gouges his most faithful employees.

There is the contractor and the manufacturer who gouges the public by using shoddy instead of pure materials, who pares off a portion of the right amount of material that ought to go into the production of an article or in the construction of a building, and who is not above slipping one or two imperfect articles into a shipment of goods, or using some defective material in a building where it is buried away from sight. They are chisellers, and are indifferent to the fact that their chiselling may result in disaster, great loss and suffering to others.

There is the debtor on the one hand who resorts to every kind of a dodge in an endeavor to escape payment of his just debts, and the creditor on the other hand who takes advantage of the difficulties of his debtors to despoil them for all they have regardless of the fact that those difficulties may be beyond the debtor's control and which to the best of his ability he is striving to overcome. Both classes are chisellers.

There is that large group who have a perverted twist or kink in their characters which induces the belief that it is all right to try and get the best of Governments—persons who will smuggle, persons who "chisel" with great ingenuity when filling out an Income Tax form, persons who surreptitiously use their radios or motor cars without a license, and so forth and so on.

Then there are numerous people who "chisel" in the discharge of their general obligations as citizens. Men and women, for example, who are too indifferent to even take the trouble to cast a ballot; who defame all persons in public office who are endeavoring to serve the public welfare; who characterize politics as dirty and corrupt and who stand aloof therefrom instead of discharging their own duty and actively assisting to raise the standard of public life.

Possibly each and every one of us is a chiseller in one way or another. And it might not be a bad idea for all of us to take stock of our own attitude towards many things and thus seek to discover just wherein we are chisellers.

Then, there is the other phase of chiselling. The sculptor who takes an uncut block of wood, stone or marble and chisels away until there emerges a thing of beauty. Such a one is typical of many men and women who are devoting their lives to chiselling away the sordidness, the ugliness, the evil of life. They are engaged in removing the grime that may have accumulated and buried that which is beautiful and good.

The vital question is: What kind of a chiseller are you?

Developing New Industry

The latest Manitoba industry to be developed is the Manitoba low bush cranberry. Hitherto cranberries have been imported into the province. The type that grows in Northern Manitoba is known as the "low bush" cranberry, which the early winter frost seems to sweeten so that frozen berries can be thawed with full flavor retained. The berries are coming to Winnipeg in 1,000 pound lots.

Radcliffe, England, with 25,000 population, boasts it has no slums.

Were Game Anyway

A former Seattle girl has "crashed" the pages of a New York poetry magazine, which was to be run by men, written by men, and read by men, only. After they had mailed a cheque and published they found it was written by Miss Audrey Wurdemann, who has been in New York the past six months. And, after seeing her picture, they published that, too.

Chile may exempt from taxation all buildings constructed by private parties.

Smothering Sensations Faint and Dizzy Spells

Those feelings of faintness; those dizzy spells; those all-gone smothering, sinking sensations which come over people from time to time, are warnings that should not go unheeded. They indicate an extremely weakened condition of the nerves and other vital organs, and should be given immediate attention. Those suffering in this way will find in Milburn's H. & N. Pills a remedy with which to recuperate their health, build up their run down system, and bring back their bodily vigor.

Ask your druggist for Milburn's H. & N. Pills.

Testing Penny Flipping Odds

Professor Hopes To Prove Heads And Tails Are About Even
Penny flipping odds are about even on heads and tails after 40,000 scientific flips. That's what Professor Pope R. Hill, of the mathematics department of the University of Georgia, has found. Months ago Professor Hill began his flipping. He assembled 200 pennies, a hundred of one date, and the same of another. He balanced each penny against the other down to one-thousandth of a gram. He expects to flip the pennies for the 100,000th time next July and then his experiment will be complete.

LETTER FROM AMAN OF 90

About His Rheumatism

He asks us to excuse his writing. We do more than that—we congratulate him on being able to write at all at his age, especially as he has been suffering from rheumatism. This is what he says in his letter:—
"Three years ago I was in bed for six weeks with inflammatory rheumatism. Since that time I have been taking Kruschen Salts, and have not had another attack. But my hands are still somewhat stiff. I take Kruschen every morning before breakfast, and shall continue to do so, because I am sure it has kept me in good shape for three years. Excuse this writing, as I am ninety years old, and use both hands to write. J.G.G.
Kruschen dissolves away those needle-pointed crystals of uric acid which are the cause of all rheumatic troubles. It will also dissolve these 'dissolved' crystals clean out of the system. Then if you keep up 'the little daily dose,' excess uric acid will never form again.

Prefer Living On Mainland

Families On Bardsey Island Find It Too Lonesome

Bardsey Island, off the coast of Wales, is becoming too lonesome for Thomas Jones and Griffith Griffiths and their families, the only inhabitants. Both men have offered their farms for rent and are leaving to take up farming on the mainland. Griffiths also is postmaster and grocer on the island. If tenants are not found, Bardsey will be deserted. Seven years ago all the inhabitants with their "kings," evacuated, but eventually it was uninhabited.

An old woman underwent an operation. When consciousness returned she was asked how she had felt under chloroform.

Fine Remedy For Acid Stomach

Four out of five people have acid stomach whether they know it or not. Pains after eating, belching, gas and bloating are all signs of too much acid. A spoonful of Bismarck's Magnesia after meals will overcome this condition within three days. Your druggist will tell you that. Try it and see.

Some Sailors Privileged

Those Who Play Football Are Kept In Port

Football has become popular among sailors and the navy. At Chatham, England, since it has been rumored that seafaring men who play the game are privileged to stay in port while others who are good only on naval occasions are sent to sea out of their turn. The gridiron stars are for the idle 100 per cent. The wives of all sailors, who know that husbands at home are safe from girls at other ports, are urging their marital mates to get on a team without delay.

Placed On Retired List

"Tally-Ho Y.C." Given Honorary Rank Of Brigadier

Known as the "Tally-Ho Y.C." and stated to have been the first British soldier to enter an enemy trench in the Great War near Mons, Col. John Vaughan Campbell, Y.C., has been placed on the retired list and awarded a limit and granted the honorary rank of brigadier. Col. Campbell earned the sobriquet because he rallied his men under enemy machine-gun fire by blowing a hunting horn and giving the traditional hunting-cry.

Chief Power Of Life

Reverence is the chief power and joy of life; reverence for what is pure and bright in your own youth; for what is true and tried in the age of others; for all that is gracious among the living, great among the dead, and marvellous in the powers that cannot die.

The plural of gladiolus is gladioli and not gladioluses, as given in a British dictionary, says an American horticultural expert. That's all right with us.

Beecham's PILLS
The World Famous Remedy for
LIVER & STOMACH TROUBLES

Leaving Pacific For Summer

U.S. Fleet Is Ordered To Concentrate In Atlantic

The United States fleet will be concentrated in the Atlantic next spring for the first time in almost four years.

President Roosevelt authorized the first line of defence to start steaming from the Pacific to the east coast after the winter months. It will return to the Pacific in the fall.

The fleet, comprising the battle and scouting forces—the latter formerly known as the Atlantic fleet—have been stationed in the Pacific since the spring of 1932.

During the past 18 months the navy has explained that the scouting force was kept in the Pacific for reasons of operating economy. The situation in the far east was understood, however, to have played a considerable part in the retention of the full fleet in the Pacific.

The reason given for the order to return was explained by Henry L. Roosevelt, assistant secretary of the navy, as a return to the fleet's normal operating policy.

Russia Must Recognize

Fair Business Practice

Hon. H. H. Stevens Raps Trade Methods Of Soviets

Russia must come again to "a recognition of fair business practice" before the nations of the world can do business on a normal basis with her, in the opinion of Hon. H. H. Stevens, Minister of Trade and Commerce.

Russia, he said, had followed a practice of disposing of goods at "any price, cost or value" which could be obtained. "Until Russia abandoned, for instance, the 'fair clause' in her contracts whereby Soviet agents were empowered to sell below the price asked by any other nation, world countries could hardly be expected to trade with her normally. Relations with Russia had been 'dilatated' by such trading practices as these.

Mr. Stevens was guest speaker at the first dinner gathering of the joint board of trade of the city of Ottawa which came into being not long ago.

Hard To Replace

People Always Find Something Staple About Old Friends

Old friends are so hard to replace. We meet new ones all the time, but the new ideas are not the real ideas of years ago. There is something about old friends. You know them, and when you know someone for twenty-five or thirty years and meet them all the time, it is a different kind of a hello than the new friend gives you, the hello from an old friend counts so much more. You look at each others eyes, and see each weathering the storm of life—who is gray, who is getting bald, who has grown the fatter, and when you both meet and one says you look the same as you did twenty-five years ago and the same compliment is returned makes the hello so different.

Credit To His Training

A citizen of Cody, Wyoming, lost a ten-dollar bill while shopping. His search for it was fruitless, but when he went to feed his dog next morning, the animal was carefully guarding the missing bill. The dog had been trained to pick up anything his master dropped. Appropriately enough the dog was a Chesapeake Bay retriever.

Child welfare is credited with saving 100,000 babies in England in the last year.

"It was beautiful—just splendid. I thought I was in heaven—till I saw the doctor."

HELP FOR TIRED WIVES

Take Lydia E. Pinkham's Vegetable Compound

"When I got tired during those hard times, I took Lydia E. Pinkham's Vegetable Compound. It was the best thing I ever saw. It gave me the strength to carry on."

Be out of every 100 women who report that they are tired, 99 will say that they are tired. Buy a bottle from your druggist today. . . . and watch the results.

Architect Thinks Era Of Skyscraper Over

Foreseen Exodus From Cities With Shorter Working Week

Is the skyscraper doomed by the approaching shorter work week and other industrial and social changes which promises to result from the revolutionary consequences of the depression?

William Orr Ludlow, chairman of the committee on industrial relations of the American Institute of Architects, in a report to the institute has declared he believes the skyscraper era may be through.

He foresees an exodus from the cities with the coming of a four-day week. Cities will be more and more business, industrial and shipping centers. People will live outside, where they can spend their leisure to better advantage.

Mr. Ludlow furthermore looks for a great building revival as good times begin to return. His advice architects, engineers, builders, city boards, city planners, to begin studying possible trends so that the new building activity will not be haphazard.

It is entirely possible that when America wakes up out of this depression it will be in a new kind of world, with vastly changed problems. The foremost of these likely will be the redistribution of population as the result of reduced hours of work.—New York World-Telegram.

Had Outstanding Career

Director Of Pasteur Institute Dies After Long Illness

Pierre Paul Emile Roux died in Paris at the age of 80 after a long and outstanding career as director of the Pasteur Institute and collaborator with Louis Pasteur in studies of bacteriology and diseases like diphtheria.

He had suffered from tuberculosis for 40 years while a colleague, Dr. Albert Calmette, who died Oct. 29, struggled to find a cure for the disease.

To much of the world Dr. Roux seemed an ascetic recluse, for he ate simply, slept on a hard camp bed, and spent much of his time in research. From 1904 to 1918 he directed the Pasteur Institute.

He studied infectious diseases and hydrophobia and produced vaccines in collaboration with Pasteur and others for anthrax, dread cattle scourge. He aided also in the development of diphtheria toxin. With Dr. Behring he received the Nobel prize for their work on serum therapeutics.

Germany's Political Prisoners

Large Number Of Persons Held In Concentration Camps

Figures published in Berlin show there are officially 22,000 persons in concentration camps throughout the Reich. Last July the official figures gave only 16,000. In July the figure of 12,000 prisoners was officially admitted for Prussia. Today the figure is put at 15,000. Last summer the Neuse Vorwaerts, the organ of the fugitive Socialists concentrated in Prussia, asserted that its own estimates showed between 40,000 and 50,000 political prisoners in German concentration camps and an equal number in German jails, making an approximate total of 80,000 or more. The official excuse for the camps is that they are intended as a temporary measure "during the revolution" for the education of those who did not understand the new Germany.

Newspaper An Institution

Col. R. R. McCormick, of the Chicago Tribune, says the newspaper is an institution developed by modern civilization to present the news of the day, to foster commerce and industry through widely circulated advertisements, to inform and lead public opinion, and to furnish that check upon government which no constitution has ever been able to provide.

Was Well Hidden

The gentleman who was engaging a new chauffeur asked the man if he had ever had a serious accident. "Only once, sir, when I had a bad front wheel skid as the result of running over a bottle." "But, goodness gracious, surely you say the bottle?" "Well, no, sir. As a matter of fact, the chap had it in his pocket."

Have Different Traditions

More eastern and northeastern Indian tribes in the United States have a tradition of a descent from the sky as the beginning of human habitation of the earth while Indian peoples of the mountainous and plateau regions of the west and southwest believe their ancestors descended from some underworld.

Snow fell for the first time in living memory in Southern Africa recently.

Hail Hail

Yes... pipefuls of Ogden's Cut Plug for men who like a tobacco that packs right, that lights right, that burns right, that is RIGHT.

It's a mighty fine tobacco—the kind men like to "stay with". And one of the finest things about it is this—the last pipeful from the Ogden's Cut Plug package is just as good as the first one. That's the kind of quality that makes a pipe a real pal—the Ogden's quality that never changes.

OGDEN'S CUT PLUG

If you "roll your own", use Ogden's fine cut cigarette tobacco and Chantecleer cigarette papers

A periscope is used at the third hole of the Aberdewy golf course in Wales. The hole is 165 yards in length and a blind one, and the strange apparatus, 30 feet high, enables the player to locate the green.

DENICOTEA Cigarette Holder absorbs the nicotine, pyridine, ammonia and resinous and tarry substances found in tobacco smoke.

Complete holder with refill—\$1.00 postpaid, or from your Druggist or Tobacconist. Dealers wanted everywhere.

224 SMITH ST. WINNIPEG, MAN.

British Aviator Has Amazing Escape When Forced To Jump In Spinning Research Trials

Flight Lieut. C. S. Staniland, test pilot and racing motor car driver, had an amazing escape from death when he was making special research spinning trials with a secret type of aeroplane near Colbrook, Middlesex, recently. Spinning trials form part of the routine work in the testing of new British aeroplanes, and these trials are first done by the manufacturer and are repeated by the official test pilots of the air ministry's experimental stations.

Often considerable risks must be taken by these pilots when some novel feature is being tried out, or, as in this instance, special research work is being done; but they develop special facilities for dealing with emergencies. It is doubtful if, in the whole history of flying any test pilot has had such a nervous moment as Flight Lieut. Staniland.

He was performing special research spinning trials at about 7,000 feet when a flat spin developed with high rate of rotation. For some time he endeavored to extricate the machine but without success. Finally he decided the time had come when he must jump with his parachute. The aeroplane was spinning to the right and he decided to jump over the left side of the fuselage in order to fall clear of the machine.

Owing to the direction and speed of rotation of the aeroplane, however, Flight Lieut. Staniland was immediately buried back into the rear cockpit of the machine. Fortunately he had not begun to pull the rip cord of his parachute, so that the canopy was still in the pack. The rear cockpit of this particular machine is deep and he found difficulty in getting up to his feet as a result of the high centrifugal loads. But eventually he struggled to his feet and climbed out of the machine for the second time.

Through all these experiences he remained perfectly cool and was able to guess the cause of his being thrown back into the machine. He reasoned he must jump this time over the other side and this he succeeded in doing, the machine still spinning flat and rapidly. He fell clear but waited to ensure there was no risk of his parachute fouling the aeroplane. The aeroplane passed within a few feet of him as he fell, and he pulled the rip cord. Immediately afterwards he saw the machine only a few feet below him. While he had been pulling at cord the aeroplane must have passed behind him, falling at a higher speed than he had thought. He landed safely near Colbrook and his aeroplane crashed in a disused gravel pit about two miles away.

Flight Lieut. Staniland is a pilot with a remarkable record. He has won many events, both on road and track, and recently during the Viceroy T.M. motor car race he set up new class lap records in a six-cylinder car. In 1928 he was selected to be a member of the British Schneider trophy team. His skill as an aviator is universally acknowledged.

Home Of Poet Restored

Philadelphia House Of Edgar Allan Poe Now Public Shrine

Restored in every detail to its appearance of a century ago, the Philadelphia home of Edgar Allan Poe has been opened as a public shrine.

It was here that he wrote the poem, "The Raven," and many stories, including "The Gold Bug." Many original manuscripts, first editions and other valuable pieces from collections of Poe's works now are on display in the restored, three-story cottage. Included among the original artifacts are a stove, a desk and bedroom furniture. A bust of Pallas has been placed in the study in which Poe worked.

A Great Responsibility

A motorist in Hull, Que., was held on a charge of manslaughter after an out of an automobile accident in which a car he was driving collided with a truck killing a friend who was riding with him as a passenger. This provides another argument against the practice of giving a lift to pedestrians on the highway. Very few motorists realize the responsibility they accept when they take their place behind the wheel of a car.

Mrs. Peck: "She's very pretty, but the rever says a word can't imagine why all the men speak so highly of her."

Mr. Peck: "I can."

The "in" New York City is cleanest in 40 years and most laden with dust and dirt in December.

W. N. U. 2020

By Ruth Rogers

494

A SMART DRESS FOR MATRONS DESIGNED TO GIVE GRACIOUS TALL SILHOUETTE

For those who like a simple smart dress to start the season, here's your number.

It will meet all day occasions admirably as the original in black wool crepe. Tucked into the becoming V-neckline in white lace that ends in a soft jabot tie. It has long-sleeved puffed sleeves.

Style No. 494 is designed in sizes 36, 38, 40, 42, 44, 46 and 48 inches bust.

The small view shows short sleeves with corded puffing trim. This interesting craft is easily accomplished. The pattern envelope explains just how to do it.

Size 36 requires 3 1/2 yards 39-inch material with 1/2 yard 51-inch lace. Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

How He Understood It

Small Boy Slightly Mixed On Name Of Book

A little boy who applied for registration at the Grifflinton club, one of the Federated Charities of Montreal, evidently thought the Recording Angel must be a woman.

Finding the registration book missing, the lady who took his name asked the lad if he would run upstairs and get it from Miss Mackay. Up he scampered, and knocking at the open door of the lady superintendent's sanctum, said breathlessly: "Mrs. Sayers says will you please give me the—Resurrection Book!"

Avoid Hunting Accidents

In deer hunting season in Missouri's rugged Ozarks a hunter without a red hat isn't well dressed. A red hat—or at least red feathers in a hat that isn't red—is supposed to be the signal to other hunters that the wearer isn't a deer. Not a single fatality was reported last year and red hats and red feathers were given much of the credit.

Black diamonds, or carbons, are found mainly in Brazil in river or stream washings and are the rarest and highest priced of all industrial diamonds.

More than half the money spent for amusement in Paris last year was for movie admissions.

Unnecessary Accidents

Mechanical Condition Of Many Cars Menace To Safety

Justice Kelly, speaking in the supreme court at Whitby, Ontario, uttered a great truth when he stated that many automobile accidents were caused by people driving cars which had long since qualified for the junkpile. His observations were made from his experience of court cases arising out of such accidents, and they will be supported by many who have been victims of accidents because of inferior, and sometimes uncontrollable cars, being driven on the highways.

This condition is, perhaps, more apparent at the present time than it has been in past years. Cars are being driven on the highways today which, in more prosperous years, would have long before been consigned to the scrap heap, unfit for further service. But that is no reason why human lives should be endangered. No car should be allowed to travel on the highway unless its mechanical condition is such as to keep it well within control, to make a safe vehicle to drive.

Both pedestrians and motorists whose cars are in safe condition have a right to such protection, and if there is no law which can keep unsafe cars off the roads then it is time one was enacted.—Oshawa Times.

Richest City In World

Johannesburg, South Africa, Enjoys Continuous And Amazing Prosperity

The world's richest city today is not London or New York. It is Johannesburg.

This fact emerges from the comments that have followed a reference made by Samuel Storey, M.P., for Sunderland, on his return from South Africa, to the amazing prosperity of the city which is the centre of the Transvaal goldfields. At the peak of this year's boom on the Johannesburg Stock Exchange, gold mining shares rose to the fantastic total of three hundred million pounds. Not financiers and business men only, but miners, school teachers, office clerks, and laborers seized the golden opportunity of quickly rising prices, and, having successfully speculated, they proceeded to enjoy their good fortune by spending it. They take no thought for the morrow.

In Johannesburg the morrow has always been left to take care of itself. As evidence that it does so, everyone points to the progress of the city, which has been continuous.

Under Three Flags Expedition

Travelling from Canada to Mexico with many stops in Canada and the United States. Over a dozen cars make up the caravan. (Above) A streamlined car which takes the lead.

At left Map of the route of the expedition will travel from Canada, through the United States to Vera Cruz, Mexico, this month.

(Below) Engineers' design for a 1934 streamlined car which is even nearer to the future streamlined ideal than the Three Flags Expedition model now on tour.

Travelling at high speeds, an automobile consumes fuel at a rate of approximately 80% of its gasoline consumption just to overcome wind resistance. Streamlining reduces this resistance greatly, hence makes power economies. It also greatly enhances riding comfort, since it permits of a far more scientific weight distribution than the old model cars allow. Until the present time, practically all passenger cars have been modelled on the lines of the

Safety In The Home

Commonsense Rules Given By Health Officer Of New York

New York's health commissioner has prepared a "home safety code for adults" containing a list of injunctions. Some of these are:

Have every room and all stairs well lighted.

Keep floors clear of grease, toys, etc., and the stairs free of all encumbrances.

Use a rubber bath mat in the bathroom.

Use a step-ladder when working above the floor.

Use non-inflammable cleaning fluids.

Keep wet hands off electrical appliances.

Read the label before taking any medicine.

Use commonsense, do not rush, be careful.

These are all rules of elementary commonsense. But it is just by the simple neglect of ordinary precautions that accidents occur in homes.

Have No "Unwritten Law"

British Countries Do Not Recognize It States Judge

Canada is told officially it has no "unwritten law." Judge Joseph Weir of a London (Ont.) court for wearing a knife upon an offender against his wife. "In the United States," says the magistrate, "judges and juries recognize an unwritten law and hold that fathers and husbands may on occasion take the law into their own hands, but never in British countries." The weakness of the unwritten law is shown in its very name; if it were on the American statute books it would be disqualifying in a day.—Christian Science Monitor.

Discussion For Next Session

Federal House To Debate On Question Of Titles For Canadians

Whether Canadians should be allowed to accept titles from the king will be discussed by parliament when it opens next January. Humphrey Macpherson, Labor member for Hamilton east, is expected to start a full-fledged debate by introducing a resolution to continue the titles-ban with the exception of judges, military and naval officers.

Premier R. B. Bennett, shortly before the close of the last session, announced the government did not consider itself bound by the Nickle antititles motion passed in 1919.

Lancashire Woman Who Claims Relationship With Edison Has Some Remarkable Inventions

Earth's Last Blind Spot

Admiral Byrd Seeking To Throw Light On Antarctica

Admiral Byrd is off. It is a long, long way to Antarctica, but Byrd is blithely beginning what is, to him, something of a homing flight. The man who established "Little America" and lived there as long as Byrd did cannot but feel that he is setting forth for a strange land. Yet, it is a fact that the land toward which the admiral is voyaging is the blindest of all the blind spots of the earth's surface. It is, in truth, the only really blind spot left.

Surely there has never been another explorer who has made his work so interesting to so many. He is the first man to render Antarctic exploration a matter of common knowledge and a topic of household conversation. He is the first explorer whose expedition, even before its starting, has been celebrated by a special postage stamp of the United States.

There is enough romance in this journey southward to the earth's most hostile limit, but there is more than that. Antarctica is a mass of land comparable in area to the habitable continents. It is, therefore, vastly more important as a field for scientific exploration than the north polar regions, which are all water. Human beings cannot live on a frozen sea or derive much benefit from it, but with the world's population ceaselessly increasing man cannot concede that any land is beyond his attainment.

Nor, probably, as a place of permanent human abode, but as a source of some of the mineral necessities of civilized life the great continent beyond the southern oceans may some day be as well known and adequately mapped as the State of Rhode Island.—Cleveland Plain Dealer.

The Empire State Building

Thousands Have Viewed New York From Observation Tower

The first week the Empire State Building observation tower opened 31,000 people poured upward to see the view. Six months later attendance during the Christmas week had fallen off to 23,000. And in a recent week only 5,648 looked over the ramparts of the highest building in the world and said, "Oooh!"

A few weeks ago a register was started up in the observatory and the results have been gratifying. Previously they thought the crowds had been too great. From a registration totaling about one-third of the total attendance it was learned that visitors came in one week from forty-six States and forty-five countries. Only one in ten came from New York City, said but true.

On the other hand two people John Stephens of Mudros and Paul Maslason of Libau, Latvia, came from places the Empire State Building executives had never heard of. They looked over their maps and saw nothing. They called up the National Geographic Society and learned that the map was on the island of Lemnos in the Aegean and that Libau is now called Liepaja and has 60,000 inhabitants. Quite educational.—New York Evening Post.

An Unusual Operation

Patient With Cancer Had Entire Lung Successfully Removed

A report on the successful removal of an entire lung from a patient by Dr. Everts A. Graham was made public by Dr. Morris Fishbein, director of the Journal of the American Medical Association.

In an article appearing in the journal, Dr. Graham and Dr. J. J. Singer, both of the Washington University School of Medicine at St. Louis, state: "It is apparently the first time in which the whole lung has been deliberately removed at one stage."

Cancer necessitated removal of the lung. The operation was performed last April 5, but no previous reports had been made public. The patient, a Pittsburgh physician, is reported fully recovered.

Dr. Singer had charge of the diagnostic end of the case.

Misses Lost Pounds

"Aunt Mamie" Williams, Negro, who once tipped the scales at 798 pounds, has complained to the Shreveport office at Jacksonville, Florida, that troublesome neighbors have caused her to lose 200 pounds. "They have made her feel 'poorly,'" she said, and she wants peace and quiet restored. She is forty-eight and works the garden in which much of her food is raised.

Following in the footsteps of Edison, the woman inventor, whom she claims as a remote relative, a Lancashire woman has to her credit a number of remarkable inventions.

Under her maiden name of Nell Bradshaw she has patented some extraordinary devices.

In the drawing-room of her home at Heaton Chapel, near Manchester, Miss Bradshaw has her newest inventions set out on the carpet, and even on the piano stool.

Her four latest and most important inventions are a lamp for penetrating fog at sea or on land; an improved robot signalling apparatus, an anti-drowning life-jacket; and a thief alarm for unattended motor cars.

With the curtains of the drawing-room closed, Miss Bradshaw demonstrated the capabilities of her lamp for penetrating fog or darkness.

WORLD HAPPENINGS BRIEFLY TOLD

Big navy propaganda warned Japan against interpreting the American fleet's removal from the Pacific as a goodwill gesture.

A thousand men will be stationed this winter at single jobs on Canada's Prince Albert National Park. It was stated by J. A. Wood, superintendent.

William F. (Caribou Bill) Cooper, 61, who carried the mail in Alaska for 30 years, died recently in Tacoma, Wash., at a sanitarium. He was a friend of Jack London.

King Victor Emmanuel made Premier Benito Mussolini minister of both the navy and the air after accepting the resignations of Air Marshal Italo Balbo and Admiral Giuseppe Siranni.

The London Daily Express said an all-empire shipping conference would be held in London early next year to preserve empire cargoes for empire ships.

Fishermen of Palermo, Sicily, reported that they have located the skeleton of the French dirigible Dismas which disappeared on a flight to Africa in December, 1923, with 32 men aboard.

Under plans approved recently by Eion Thomas Murphy, Federal Minister of Interior, work is being started on the Jasper Highway, west of the town of Jasper, over the 17-mile stretch to the British Columbia border.

A 20-year-old apple tree is bearing seedless and coreless fruit on the farm of Dr. Perry Pulteney, near St. Joseph, Missouri. Never before has any tree in the orchard produced such fruit. The apples resemble the Jonathan variety.

If long-term credits are arranged, the absorbing capacity of the Soviet Union not only for American machinery and tools but also for general consumers' goods are unlimited, Louis Kon, former trade commissioner in Canada for Soviet Russia declared in a recent speech at Montreal.

Letter Sorters Are Clever

Halifax Postal Employees Delivered Letter Addresses In Figures

Letter sorters in the post-office don't irritate people to address letters in code, but they made it known they could understand some of them.

One envelope arrived at Halifax, Nova Scotia, with a series of numbers but not a letter written on it. This took a little thought for the boys who toss around letters like a "hustler" does handbills. But the letter finally was delivered to a soldier in Wellington barracks.

Each figure represented the corresponding numerical position in the alphabet they discovered.

Nickel Exports Higher

In the first six months of the current fiscal year Canadian exports of partially manufactured nickel increased 450 per cent. over those for the corresponding six months of 1932.

For the first half of the last fiscal year nickel exports amounted in value to \$2,966,120, while for the same period this year the exports were valued at \$13,473,280.

An electric light bulb from Ada, Ohio, which has been in constant use for 30 years, is on display at the World's Fair at Chicago. The bulb was purchased by W. H. Freud at the St. Louis exposition in 1903.

Nearly half of England's 44,500,000 people are smokers.

Have You Pimples or Boils?

Mr. T. A. Boney of 145 Wellington St., W. Toronto, writes: "I had a bad case of boils and pimples on my face. I tried many remedies but nothing helped. I then used Scott's Emulsion and after only two bottles of it my face was clear and my skin was smooth. I am now free from all skin troubles. I can recommend Scott's Emulsion to anyone who has pimples or boils. It is a great skin medicine. I have seen it sold by druggists everywhere. Write Dr. F. C. Clegg, Buffalo, N. Y."

Water Buses On Thames

Passenger Traffic Is Planned For London's Water Highway

London's broadest highway, which has been practically neglected for 50 years or more so far as passenger traffic is concerned, is likely, before long, to come again into use. Private enterprise will probably soon provide a service of "water buses" on the Thames. Arrangements are afoot for the establishment of a service of vessels to call at the long-neglected piers which used to be served by the "penny steamers."

All the boats will be capable of a speed of 17 miles an hour. Express or non-stop boats will take about 33 minutes between Hammermith and London Bridge.

During the years 1905-1908 the London City Council ran a service of passenger boats on the Thames, which was eventually stopped because it did not pay.

It is believed that with the increased passenger loads of today, and faster, more economical and weather-proof boats, such a scheme will now be a success.

Ireland Investigating Automobile Accidents

Despite Every Effort Number Has Not Decreased

That the government appoint a committee to investigate the large number of automobile accidents in Northern Ireland has been asked by the Ulster Automobile Club. The request was made following a meeting in Belfast at which it was shown that the automobile claimed at least 20 lives a day in Northern Ireland, and that, despite present efforts of the government, the number of road accidents has shown no decrease.

Not Right Solution Draught Punishment For Criminals

Suggested By Chicago Judge

There is a judge in Chicago who thinks habitual criminals should be executed. Further he would have motion pictures made of the executions and displayed to first offenders. The jurist believes that only in this way can the war against crime be won. Funny thing about those entrusted with the operation of the legal machinery in the country next door is that, almost without exception, they run to extremes. It will occur to the average reader of newspapers, we think, that if there was stern and summary punishment of the known law-breakers in the United States the crime situation would quickly be cleaned up. The Chicago judge has reasoned it out the habitual criminal has forfeited his right to live in society, and should be done away with. There are records, however, of old offenders reforming and leading useful lives, and we have an idea that the Chicago jurist's idea will go begging for support. General opinion seems to be that the crime problem needs a more up-to-date solution than this one, which is but a throwback to the days when criminals of all classes were hanged on the public gallows as object lessons. Those public executions did not prove to be the deterrent they were expected to be, and there was none to submit a brief for them when an enlightened citizenry demanded abandonment of the ghastly practice.—Hamilton Spectator.

SEES MISTAKE IN REICH'S ACTION IN QUITTING LEAGUE

London, England.—Prime Minister Ramsay MacDonald declared Germany's notice that she would quit the League of Nations "almost amounts to the repudiation of the peace machinery of the world."

The Prime Minister was speaking at the Guild Hall banquet given by London's new Lord Mayor, Sir Charles Collett.

"We have reduced our armaments to a point where we can rightly claim in the face of the world not a penny is being spent which is not necessary for defence in the light of present conditions," he said.

"The British government in the last 12 months repeatedly has come to the rescue of the disarmament conference. It is deplorable that, just at the moment another attempt was being made to meet German claims, Germany not only withdrew from the deliberations, but has given notice to leave the League of Nations. Such an act amounts almost to repudiation of the peace machinery of the world."

Mr. MacDonald said some terms of the peace treaty and much that had occurred since then "undoubtedly" led to irritating grievances in Germany, "but the policy she has adopted to express and remedy these grievances have only increased the difficulties in meeting her case."

"Her motive," he declared, "I do not question. We have always believed the best policy was to help Germany get out of the conditions she resents. The British government is not longer of any practical value, and consequently the United Kingdom will withdraw from it on December 7. The House of Commons, crowded as it re-assembled, cheered this statement by Walter Runciman, president of the Board of Trade.

With the exception of Japan and some other nations practically all the 66 nations represented at the conference adhered to the treaty negotiated in the early and optimistic stages of the great London parity.

World Tariff Truce

Britain Considers Pact No Longer Of Any Value.

London, Eng.—In view of the defections from the world tariff truce negotiated in London last June the British government considers the pact is no longer of any practical value, and consequently the United Kingdom will withdraw from it on December 7. The House of Commons, crowded as it re-assembled, cheered this statement by Walter Runciman, president of the Board of Trade.

With the exception of Japan and some other nations practically all the 66 nations represented at the conference adhered to the treaty negotiated in the early and optimistic stages of the great London parity.

Since the abortive adjournment, if not conclusion, of the London conference, however, the truce has gradually come into disfavor. Mr. Runciman pointed out Holland, the Irish Free State, Sweden and Switzerland had given notices of withdrawal while France and Denmark had made substantial reservations.

Club At Oxford Suspended

Suspected Of Communist Tendencies And Forbidden To Continue Activities

Oxford, England.—University of Oxford authorities have suspended the "October Club," which has a membership of several hundred students and is suspected of Communist tendencies.

Club leaders were called into a long conference with the proctors and at its conclusion the suspension was announced, the club's members apparently having declined to agree to conditions laid down by the authorities. The club will be forbidden to continue any form of activity so long as the suspension lasts.

Supporters of the club claim it is solely for the purpose of studying Communism, not promoting it.

Deal With Mosquito Pest

Death Ray Idea Is Being Tried Out In Trinidad

Port of Spain, Trinidad.—Merits of a "mosquito death ray," installed at the French penal colony on Devil's Island, are under investigation by health authorities here with a view to its possible adoption in Trinidad's prisons.

The ray, developed by a Parisienne, Mlle. Germaine Gourdon, kills mosquitoes by electrical waves, and remarkable results are claimed on its behalf.

W. N. U. 2020

Roosevelt Announces Larger Relief Program

Expects To Give Work To Four Million Men

Washington.—President Roosevelt has announced an expansion of the federal relief program aimed at taking 4,000,000 men off public relief rolls.

The plan involves the creation of a civil service administration and the use of \$400,000,000 of public works funds.

Through these additional funds the administration intends to increase the part time work of men now on relief rolls so that they may be put on a self-sustaining basis.

It is intended 2,000,000 men shall be put on a self-sustaining basis by Nov. 26 and that an additional 2,000,000 men may be put on this basis by Dec. 15.

Approximately 3,000,000 families are now being cared for by public relief agencies, a reduction since April of 1,500,000 families.

Other recovery signs noted at the White House were:

A rise in farm prices for the week ending Oct. 25 from an index figure of 50 to 52.

A rise in prices paid by farmers of less than one per cent.

A decrease in retail food prices of one per cent.

An average rise of less than one per cent. in commodity wholesale prices.

Livestock For Winter Fair

Several Caravans Will Go From Alberta To Toronto

Edmonton, Alberta.—About ten caravans of Alberta's best livestock will go to Toronto for the Royal Winter Fair opening Nov. 21. The stock has now been finally selected under government supervision and comprises three cars of market steers, one of which is from the university farm, three cars of Holsteins, a number of Ayrshires, 16 head of purebred Shorthorns, 13 head of purebred Herefords, four purebred Angus, one car of horses, and one car of sheep.

The animals have been picked from herds in various parts of the province and are declared to be a particularly fine lot, with good prospects of winning some of the main prizes as in previous years.

Canadian May Get Contract

Large Number Of Grain Elevators To Be Constructed In Argentine

Port Arthur, Ontario.—Contracts, which will involve an expenditure of more than \$30,000,000, for the construction of a large number of grain elevators in Argentina may be granted to a Canadian.

G. H. Howe, head of a local elevator construction company, has been in the South American republic for some weeks, touring the districts in which the elevators are to be erected. In a telegram received from him, he declared confidence in securing the contracts.

Thirty Planes Leave

France For Africa

Air Armada Will Make Fifteen-Thousand-Mile Trip

Latres, France.—A great French air armada of 30 planes manned by 60 picked aviators started a mass flight to Africa on November 8. The first squadron of 15 machines took off in triads.

The start of the so-called "black cruises" was marked by a balmy morning throwing one plane tardily out of step in the sky parade as the remainder took off.

On the 15,525-mile flight from this airport near Marseilles, dangers of desert and jungle will be braved for the sake of France's military, political, technical and commercial prestige.

Library Opened By King

London, Eng.—A new home for 4,000,000 books was inaugurated by the king when, accompanied by Queen Mary, he opened the new buildings of the National Central Library at Bloomsbury. This country owes much to the late Andrew Carnegie and the generous policy of his trustees, especially for their help in developing the public library services. His Majesty said.

More Work Necessary

London, Eng.—Declaration that a regular trans-Atlantic aerial service between Britain and Canada cannot be begun until a "great deal more" experimental flying is done, and suitable air bases established, is made by the aeronautical correspondent of the Morning Post.

SIR JOHN SIMON ON ARMS POLICY OF GREAT BRITAIN

London, Eng.—Sir John Simon, British Foreign Secretary laid the issue of disarmament before the House of Commons. He frankly recognized the gravity of the hour, but he dismissed deplorable exaggerations.

Whether Germany remained at Geneva or not, the British cabinet minister declared, the supreme aim of British policy would be to promote reconciliation — to endeavor to reconcile Germany's demand for equality with France's desire for security. That was the general political issue.

Sir John's exposition of British disarmament policy, with full cabinet backing, was designed to meet the attack from two sides—from Labor members clamoring for further disarmament and from Conservative die-hards seeking further strengthening of the forces.

"At a time like this, when the international system set up since the war is in jeopardy, we have declared ourselves without any qualification believers in and upholders of the League of Nations as the best possible instrument for international peace," declared Sir John.

"We shall not get out of our difficulties by trying for isolation when the conditions for isolation have disappeared. We have an immense moral authority to assert and we shall use it by making no special or secret alliance with or against any country, but work for friendship and peace between them all."

"There were early signs of the coming storm in parliament. Sir John took a dig at David Lloyd George, who sat in the front opposition bench, as an international movie star. He referred to Lloyd George's talk on disarmament for a new world film.

"The minister had hard words also for Sir Stafford Cripps, one of Labor's leaders, for his declaration at Bristol that in disarmament Britain had done nothing; that the British disarmament convention draft, his of Geneva discussions, would 'make the gods laugh.'"

He described Sir Stafford's statement as "a classic example of the morbid delight which some Englishmen take in the face of the plainest facts in fanning their own nest."

"When an appeal is made for fair play for Germany, are we not entitled to demand fair play for Britain too?" he asked.

It was a still greater outrage Sir John continued, for any man to seek to exploit the peaceful sentiment of British homes by falsely pretending there was any difference between the two sides of the House of Commons in the desire for peace.

Sir John only gave some figures to show what Britain had actually done for disarmament. Since 1914 her capital ships had been cut from 65 to 15; her cruisers from 108 to 64; her destroyers from 216 to 152; her submarines from 74 to 59; torpedo boats from 108 to all.

The naval personnel had been reduced from 152,000 to 90,000; the regular army had been reduced from 258,996 to 206,534. The Indian army had been cut by 17,000; the air force

MAY TRANSPORT SOME OF LONDON'S TEEMING POPULATION

Above is a working model of the new system of transport known as the "Railplane," which has been submitted to the London (England) County Council by Mr. Charles Boot, a Sheffield builder. Mr. Boot's scheme, if adopted, would involve the building of two satellite towns in Essex, linked by the railplane aerial railway to London. The railplane consists of streamlined cars slung from bogies which travel on a single overhead rail. The cars are propelled by air screws fore and aft, are driven by electric motors or oil engines and their chief advantage is cheapness in construction and operation. The railplane is designed to work at speeds up to 120 miles an hour.

LIFTON'S SUCCESSOR

Tom Sopwith, noted English sportsman and aeroplane builder, who has filed a formal challenge to race an American entry for the America's Cup, the world's most coveted yachting trophy, in 1934. He will use an all-steel boat, designed by Chas. Nicholson, who designed two of Sir Thomas Lipton's famous Shamrock challengers.

by 20 per cent. since the post-war period.

"Shane," interrupted a voice from the Conservative benches, when Sir John said Britain stood no good no further than fifth in the list of national air forces.

"Great Britain is using and will continue to use every effort," he said, "to promote international reconciliation and disarmament."

"Nothing had occurred, he added, "to justify Germany's shock tactics in leaving the League of Nations." "The most material contribution to restoring the confidence of Europe would be an international disarmament agreement to which Germany must be a party."

Mussolini May Call Meeting

Discussion Of Disarmament Statement Is A Possibility

Rome, Italy.—The possibility that Premier Mussolini will call a meeting of four European powers and the United States to consider the disarmament statement was seen by well informed circles here after II Duce and Hermann William Goering, German minister without portfolio, had an hour conference.

The conversation on disarmament was said to have revolved around the method to be pursued to re-open the arms parity, broken off shortly after Germany withdrew from Geneva.

Princess Has Operation

London, Eng.—The Princess Royal, Countess of Harewood, underwent an operation for the removal of her appendix at her Mayfair home. The King's surgeon, Sir Stanley Hewett, operated. The Princess Royal had been suffering from a severe nervous breakdown.

Britain Will Make Second "Token" Payment

Announcement Made In House By Chancellor Of Exchequer

London, Eng.—The British government will make another "token" payment when the next instalment of the war debt to the United States falls due December 15, paying \$7,500,000 in lieu of the \$117,000,000 instalment.

Neville Chamberlain, Chancellor of the Exchequer, made this announcement shortly after the House of Commons opened, simultaneously with a similar statement in Washington by President Roosevelt.

The payment will be made in United States currency so with the pound above par in the United States the British government will effect a small saving.

It was made clear the United States does not regard Great Britain as defaulting on her war debt instalments, as France and some other nations have done. President Roosevelt was emphatic on this point in announcing acceptance of the "token payment."

"It has unfortunately," said Mr. Chamberlain, "not proved possible to reach an agreement for a final settlement."

"His majesty's government have stated they are ready to resume negotiations on the general question whenever after consultation with the president it may appear this can usefully be done."

Troops Parade In Moscow

Fifty Million Take Part In National Holiday Celebration

Moscow, Russia.—While all Soviet Russia observed a national holiday, Moscow's red square was the focal point. A million persons were estimated to have paraded. From a reviewing stand atop the Lenin mausoleum Stavitsky, Kalinin, Molotov and their colleagues in government and Communist party watched and answered the cheers of the marchers.

Some 50,000 troops of the red army's Moscow garrison, together with several battalions of sailors, carried out the military phase of the celebration. The military held the square more than three hours as infantry, cavalry, artillery, tanks and the full complement of a modern army corps paraded in smartly-trained units.

MANY KILLED AS REVOLT IN CUBA FLARES UP AGAIN

Havana, Cuba.—A state of war existed throughout Cuba, proclaimed by President Grau San Martin after a vicious army and civilian rebellion, 24 hours old, had killed an estimated 52 persons and wounded 183 others.

Reports came from Matanzas, just east of Havana, that the almost whole of Matanzas province had joined the uprising and that the ABC secret society had captured the town of Bejucal.

Previous reports said the movement had spread to Santiago and that former army and navy officers from the Isle of Pines province were prepared to march on the capital. A hull in the day-long fierce fighting brought ghastly silence to Havana as night fell, but further clashes were regarded as inevitable.

Rebel troops during the day took possession of three important fortresses, San Ambrosio, Dragones and Alcazar, placing in each nearly 1,000 well armed dissidents. A sharp battle with gunboats in Havana harbor ensued.

Official reserve shrouded the condition of the gunboats "Cuba" and "Patricio" after the engagement, but it was said in shipping circles the vessels were in bad shape. Gunners at Alcazar fortresses claimed they were both near sinking condition. Harbor police said they were "badly damaged."

President Grau San Martin ordered the courtmartial of any "newspaper director who publishes news of an alarming nature."

Automobiles filled with armed ABC members and rebel soldiers rushed madly through the almost deserted streets and drew the fire of Loyalists lying in the grass in public parks. Clanging ambulances sped through the streets as frightened Cubans peeped through tightly shuttered windows, anxiously seeking information regarding the progress of the battle.

Foreign property was not attacked, except for the seizure by a group of soldiers of an automobile belonging to a Spanish employee of an American and shots fired on the American club by soldiers.

BRITAIN WILL INCREASE SCOPE OF DOLE PLAN

London, Eng.—Sixteen million persons will be covered by Britain's gigantic new unemployment insurance scheme. The measure for revising and co-ordinating previous plans with important additions was formally introduced in the House of Commons by Sir Henry B. Bettoner, Minister of Labor.

The Labor party executive decided to present a motion of censure on the government on account of its disarmament policy. The government, taking note of this, also scrutinized the result in the Skipton, Yorkshire, by-election, where the Conservatives held the seat but with a greatly reduced majority.

Labor is in an overwhelmingly minority in the House of Commons and there is no chance of its constructive motion getting acceptance, but the result of the Skipton by-election was cheering to the Labor ranks. The Conservative candidate was elected with 18,158 votes out of a total of 42,216 for four candidates. In the general elections the Conservative had 28,013 out of 41,066, in a straight fight.

The government's vast new unemployment insurance bill, the most widely-embracing of all social schemes introduced at Westminster, adds 4,000,000 persons to those workers who are now in the scope of its provisions. Copies of the bill will be distributed, but the main discussion will be deferred to the new session opening November 22.

At present there are somewhat more than 2,000,000 people on the unemployment registers, a decrease of about half a million in the past 12 months. A questioner in the House elicited the further cheering information the unemployment insurance bill will show a surplus on account of the current fiscal year of more than \$25,000,000, which will meet winter contingencies and allow of something towards the deficit of \$115,000,000 caused when the fund got out of hand and the dole was created.

The bill is in two sections. The first is that for unemployment insurance proper, in which the benefits payable are covered by contributions payable by the workers. The second is that dealing with unemployed receiving assistance not covered by the contributions.

The first section generally continues the existing law in regard to rates of benefit and contributions, but with provision for an extended benefit period in the case of those with good contribution records.

The minimum age for entry into the scheme will also be lowered to the school-leaving age, with benefits payable from the age of 16, and wide extensions in instruction courses are provided. The fact the fund is now operating with a credit balance instead of running heavily into debt as two years ago, makes these extensions possible.

More Gasoline Used

Saskatchewan And Alberta Increased Consumption This Year

Ottawa, Ont.—Alberta and Saskatchewan increased their consumption of gasoline in the first eight months of 1933 as compared with 1932, according to the Dominion Bureau of Statistics. All the other provinces showed decreased sales. Alberta was this year the third highest consumer, coming next to Ontario and Quebec, whereas last year Alberta was fourth, coming just behind British Columbia.

This year the third highest consumer, coming next to Ontario and Quebec, whereas last year Alberta was fourth, coming just behind British Columbia. Total sales for the eight months were 318,335,000 gallons as against 326,447,000 in the same period of 1932.

May Have New Airport

Project For Winnipeg Would Give Employment To Many

Winnipeg, Man.—Plans for a new airport for Winnipeg, entailing construction of a huge artificial lake, two miles in diameter, within seven miles of the heart of the city, were announced by L. W. Hicks, chairman of a joint committee of representatives of the Winnipeg board of trade and the aviation league. The lake would have facilities of landing either land or seaplanes of any size.

The project, the committee hopes, will be built as an unemployment relief plan by the co-operative efforts of the Dominion, Manitoba and civic governments.

The English Way Of Hoarding

Government Allows People To Keep Gold Unless It Is Needed

The Argonaut, San Francisco, says: Great Britain, long wise in the ways of finance and public psychology, has adopted an unusual attitude concerning the hoarding of gold. Disclosure of this attitude, at a time when the United States government is actively engaged in prosecuting a prominent citizen for refusal to turn his gold over to the Treasury, brings to light a sharp difference of policies as between our country and Great Britain.

American observers have been puzzled for some weeks by the fact that practically every ounce of gold sold on the open London market—including American gold now being exported—has been purchased, not by the central banks of Europe, but by individuals. Tracing the transactions further, it is found that this gold is not being deposited in commercial banks and is not going into the arts and manufactures.

Where, then, is it going? It is going into hoarding, and everyone in Europe, including the bank and government officials, are quite aware of it. But no one is disturbed; there are no arrests, no prosecutions. England takes the reasonable attitude that a man's gold is his own and he may hoard it if he wishes.

This hoarded gold constitutes a second line of defense, a hidden strength, extra assets of credit and money which can easily be made available by government decree at any time. And it looks much better for citizens to purchase the gold and hoard it against future developments than it does for a government to do so. For government can maintain a straight face, join happily in international agreements concerning the maldistribution of gold, resting serene in the knowledge that their citizenry has huge supplies of the yellow metal hidden away which the government can, and will, demand whenever it becomes necessary.

Used Skill To Save Home

Woman Made Success Of Rug-Making As Business

Here is the story of a woman who met adversity with a smile and turned it into good fortune by courage and industry.

Four years ago Mrs. Estelle Withers, of Granville, Centre, N.S., was faced with a mortgage that threatened her with the loss of her home. She had no money, and it seemed the home must go for lack of it. Perhaps it would have, too, had not Mrs. Withers been out of the run of ordinary individuals.

She cast about for ways of raising cash. She was an excellent hooker of rugs. Her handicraft had been commented upon often. She had, besides, made some sales of her designs; infrequent, it was true, but when some had been sold, why could not more be sold? People needed mats.

She finally decided to take up rug-making as a business. She disposed of few at first but gradually her sales increased as knowledge of her skill widened. One rug she sold for \$125; others brought proportionately smaller prices.

Soon the mortgage had been paid off. Other debts went too. And Mrs. Withers found that she was deriving a comfortable income. She had to keep hooking and selling her rugs. Now she sells them as fast as she can hook. More than that, she has booked orders which will keep her deft fingers busy all winter. One order for nine large rugs came from a commercial firm in Halifax.

A Hopeful Outlook

Many People Could Learn Lesson From Robinson Crusoe

Robinson Crusoe, cast on a desert isle, made a balance sheet of his fortunes, good and evil. Robinson wrote: "I am cast on a horrible desert isle."

"But I am not drowned, as all my ship's company was."

"I have no clothes to cover me."

"But in this hot climate, if I had them I could hardly wear them."

"I am without defence against man or beast."

"But what if I had been shipwrecked on the coast of Africa, where I saw beasts?"

"I have no suit to speak to me."

"But I have gotten enough to supply my wants as long as I live."

Unemployment is heavy. But trade is expanding. Taxation is high. But the revenue is rising. The world is full of sorrow. But it is pretty good to be alive.—London Daily Express.

Someone ought to offer a reward or a trophy or something for discovery of an audience in which 22 per cent. can sing 16 per cent. of any version of "O Canada."

W. N. U. 2020

"THEY SHALL NOT GROW OLD AS WE WHO ARE LEFT"

Remembrance Day, November 11th, and once again the world bowed in silence to honor those who fought in the Great War, and whose mortal remains rest in the four corners of the earth. As Big Ben tolled the eleventh hour His Majesty King George stood before the great Cenotaph in Whitehall, London, to pay tribute to the Empire's dead, while on Parliament Hill, Ottawa, and before the Altar in the Memorial Chamber, Canada took part in the Armistice Day ceremony. It is on the Altar at Ottawa, shown above, that the Book of Remembrance, containing the names of all Canadians who served in the Great War, will rest after it has been completed.

Needed Great Patience

Wild Humming Birds Are Tamed By U.S. Woman

Exercising patience and perseverance that would put to shame many wild animal trainers, Mrs. Vicia Evans, Kansas City bird-lover, has accomplished the almost "impossible" by taming several wild hummingbirds which frequent her flower garden.

So tame have some of the tiny birds become that several will actually fly into the house and partake of their sweetened water from the same table at which the family are eating.

Mrs. Evans' strange hobby began three years ago when a bird fancier told her emphatically that hummingbirds could not be tamed. "He was so persistent about it I determined to tame several hummingbirds I had seen around my flower garden," Mrs. Evans said.

Arming herself with a test tube filled with sweetened water and topped by a brightly-colored flower, Mrs. Evans assumed the pose of the Statue of Liberty in the flower garden.

For hour after hour the birds watched Mrs. Evans, but none would venture near. When the birds would disappear she would rest from her pose.

Finally, a tiny bird, more venturesome than the rest, dipped down, stuck its long beak into the sweetened water for a quick drink and then hurried away.

A few days later the performance was repeated. After weeks and weeks of patience the bird became so fond of the sweetened water that it would appear quickly so Mrs. Evans assumed her pose and would pause long enough for a leisurely drink.

Last summer the same bird returned with several others, and Mrs. Evans resumed her attempts to tame the tiny creatures.

Thus far she has been able to tame several. While most of them will pause at the test tube for only a brief drink, her favorite, "My Lady," has become so tame she will fly into the house and partake of her meal from the family table.

Easy To Avoid

A player, grievously afflicted with the malady of tossing his ball, walked over to the professional in a fit of despair and exclaimed disconsolately: "I'm hitting my ball every time right on top. Can you tell me how to avoid doing so?"

"Easily, sir," replied the professional. "Just turn the ball upside down and hit it in the same place."

Canada's Indian Population

The Indian population of Canada is said to be practically stationary at about 108,000 which is probably about half as many as there were in British America in the early days. It is doubtful if there were more than 1,500,000 Indians on the whole continent north of Mexico when the white man came.

Three defendants in a case in London recently were named North, Northeast and West.

Vouches For Story

Young Scot Tells About Seal That Throws Rocks

You've all heard fish stories, but here's a story about a rock-throwing seal.

This is told by a young Scot who is visiting Vancouver from the prairies and who at one time was on a fishing-boat operating out of Campbelltown, on the west coast of Scotland. According to this young man, he was below in his bunk one day when he heard a sound like the threatening of approaching aars. Thinking it to be someone rowing over to buy some fish, he went on deck.

Suddenly a large seal popped up out of the water off the port bow. The seal was holding a rock between his two flippers. Then it hurled the rock at the fishing-boat, which it struck with a resounding thud. After joyously clapping its flippers together the seal dived again.

The young Scot called the remains of the crew on deck to witness the antics of the frolicsome mammal, which lashed until the seal became tired of tossing rocks and swam away. It's the truth, errra word!

When Host Work Is Done

A protest against the Civil Service Commission's ruling that 40 shall be the maximum age at which persons can apply for federal jobs, has been handed to President Roosevelt. The protest, made by Chairman Cochran, of the House Committee on expenditures in Government departments, was backed by psychologists, who said people were likely to do the best of their lives between the ages of 40 and 60.

Gar Wood, famous speed boat racer, is decidedly superstitious. He never starts a race unless his boat contains two tiny teddy bear dolls.

Electric safety razors are becoming popular in Netherland India.

Are Continents Adrift?

U.S. And Canadian Astronomers To Determine Truth Of Theory

Northwestern University astronomers of Evanston, Ill., in conjunction with the staffs of two Canadian observatories, that at Ottawa and the other at Vancouver, have determined to settle once and for all a theory that the continents are adrift. Four other United States observatories will assist.

As a result, Dr. Oliver J. Lee, director of Dearborn Observatory, maintained by the university, said observations will be carried on for two months. Figures obtained will be checked against measurements to be made in 10 years when, if the drift theory is correct, the continents should be getting narrower. In the tests to be made the longitude at each observing station will be carefully determined.

An Emergency Remedy

Something Sweet Will Stave Off Anxious States

If you feel a spell of forgetfulness coming on and find you don't know where you are or how you got there, eat a lump of sugar, a bar of candy or a slice of cake. That will revive you. Thus did Dr. A. Graham, professor of surgery at Washington University, advise the Oklahoma City Clinical Society's Annual Convention. He described his procedure in a rather delicate operation that cured the ailment permanently. He advised sweets as an emergency remedy.

Teacher—Smith minor, what did you whisper?
Smith—I said you were a silly ass.
Teacher—Disgraceful, but I am glad you told the truth.

Country Boy: "Listen, Jiminy, I hear a cuckoo."
City Boy: "Gee! I wonder whose clock it escaped from?"

Looks Like Hopeless Task

Mohammedan Sailor Uses Small Chance Of Going To Mecca

Consider the saga of Abdul Mussen, Mohammedan sailor who would go to Mecca but can't pay his fare.

It was to earn his way to that spot that Mussen went to sea. After 14 years of travel, Mussen is farther away financially and geographically than ever before. As a "donkeyman" tending the boiler on the British freighter "Brangien," in port. He was on the other side of the world from the shrine which the Moslem must visit before he can lay claim to paradise. A lot of sailors have girls in every port, Mussen has debts.

Mussen needs \$1,200 before he can make the pilgrimage, and he only makes \$2 a day.

Ships have carried Mussen by Jeddah, Mecca's seaport, but Mussen could not go because things had not been made "quiet." Before the faithful can kiss the black stone upon which Abraham laid his son Isaac 3,500 years ago and which Mohammed later consecrated, he must square his debts. Mussen's extra shillings go to a dozen ports to pay up debts.

Once he got \$10 but unfortunately the next port was Jamaica and Mussen came back to the ship with two shillings and a dark brown taste. Each year Mussen has seen a friend of Mecca. Last spring it was Hassan, and next year it will be Khalil Bedul, who will quit ship at the home port. Meanwhile, Mussen continues at the boiler.

Well Paid For Waiting

Man In South Africa Found Delay Blessing In Disguise

Luck plays strange tricks. A man in Johannesburg, South Africa, when filling in the details on the counter of an Irish Hospitals' Sweepstake ticket, chose the non-descript, "Gladya and Co., Johannesburg." His intention, presumably, was to let Gladya share his good fortune should he win a prize. Who Gladya was, whether sweetheart, wife or daughter, is not known.

The counterfoil was drawn against the horse which won the Cambridge-shire, and thus the owner became entitled to £50,000 from the sweepstake prize fund. But as the non-descript seemed to imply dual ownership, the auditors held up the payment of the money until the subscriber could convince them that he alone was the rightful claimant. This took time. Yet the delay was a blessing in disguise, for during the waiting period the South African currency exchange rate improved, with the result that the holder of the winning ticket received £9,400 more than he would have obtained had payment been made when first applied for.

Record Was Unofficial

Saskatchewan Pullet Beat Coast Champions In Egg-Laying Contest

University of Saskatchewan poultry experts dug into files to prove that a hen can lay more than 357 eggs in 365 days.

When "Dauntless Derreen" at Agassiz, B.C., equaled the official world egg-laying record, she didn't touch the unofficial mark which was achieved by "Lady Victorine" at the University of Saskatchewan three years ago. But "Lady Victorine" was not entered in an official contest, so her work goes without recognition.

Prof. R. K. Baker, head of the university Poultry Department, said "Lady Victorine" laid 358 eggs in 365 days of her pullet year. "Lady Victorine" was a Barred Plymouth Rock. "A pullet needs a little personal attention to lay 358 eggs in a year," said Professor Baker. "A few small heads off the growing green corn, or any little snack of green stuff that will tempt the appetite, helps a lot."

Trying Another Way

Children will be barred from "terror movies" if a campaign of the Milwaukee Woman's Club is successful. If we are not able to stop production of terror pictures, we will work for a law prohibiting children under 14 from attending movies." Mrs. Clinton M. Barr, committee chairman, said.

A new system of steel construction designed by an Italian architect is said to cut the usual costs in half.

Well-Informed Clerk

A gentleman wishing to settle a point or two on art approached the information desk of a certain public library.

"Where," he asked "shall I find something on Correggio and his 'Flight Into Egypt'?"

"Everything about aviation in Room 121," responded the clerk.

Italy's lottery tax has added several millions to her revenue this year.

England Claims Drug Habit Is Increasing

New Drive Is Launched Against Continental Drug Habit

Drug-smuggling and drug-taking are on the increase in England. Extra customs officials, especially trained to ferret out smugglers, have been posted at all ports in a new drive against continental drugs. It is estimated that a schoolgirl's book bag being carried by an elderly woman. It was found to contain a large quantity of morphine.

The woman said she had been asked to take the bag to a girl whom she had met at a continental hotel. Her story proved to be true but she had been made the tool of smugglers.

Despite the extraordinary precaution taken by physicians to prevent dangerous drugs from being used illegally, the drug habit continues to spread, as is shown by the increasing number of persons who appeal to doctors to be cured.

"Drug-taking is undoubtedly increasing in this country," according to E. W. Gough, leading British chemical manufacturer and expert on drugs and poisons. "It is a common experience for a retail chemist to be asked to supply drugs on a faked or falsified doctor's prescription, but these precautions are lessened by the drug smuggler."

Despite the extraordinary precaution taken by physicians to prevent dangerous drugs from being used illegally, the drug habit continues to spread, as is shown by the increasing number of persons who appeal to doctors to be cured.

"Drug-taking is undoubtedly increasing in this country," according to E. W. Gough, leading British chemical manufacturer and expert on drugs and poisons. "It is a common experience for a retail chemist to be asked to supply drugs on a faked or falsified doctor's prescription, but these precautions are lessened by the drug smuggler."

Analysis Of Poison Ivy

Chemists Searching For Substance Which Attacks The Skin

The virulent essence of poison ivy does not vaporize and therefore simply being near the plant is not dangerous. One must have actual contact with the poison of the plant to be affected.

This is the conclusion of a study of poison ivy being made by Wesleyan University scientists in collaboration with the National Research Council of Canada.

In the folklore of poison ivy are many stories of persons so sensitive that even the wind blowing over the plants will poison them. The Wesleyan studies show there must be some tangible substance to act as a carrier from plant to person.

Nine hundred pounds of ivy leaves have been gathered at Middleton, Conn., dried, ground and treated to extract the itchy-provoking oil. By chemical analysis it is hoped to learn the substance in the oil which attacks the skin.

Some of the oil has been sent to Ottawa, where R. H. F. Mansel, of the National Research Council came with Professor G. Albert Hill, in charge of the experiments at Middleton.

The Danger Of Consistency

People Often Stick To Statement Even If Opinion Changes

Walter Lippman, writing in the New York Tribune says: there is something about making a speech or writing an article which perverts the human mind. When the utterance is published the Rubicon has been crossed and the bridges have been burned. It seems to end the inquiry, and after that we almost cease to be interested in the truth, being so pre-occupied to prove that we already possess it. What between the demand of the audience for an infallible prescripser, the vanity of the speaker, and the terror of those who lie in ambush ready to quote what he said last year against what he may believe this year, the impulse is almost irresistible, once a man has published his opinion, to say: "That's my story and I stick to it."

Just Across The Line

Two drug traffickers were arrested recently using The Niagara Falls Review, one in Canada and the other across the line. One, sentenced to Montreal, must serve fourteen years in a penitentiary, receive twenty-five lashes and pay a fine of \$3,000. The other tried across the line was freed on a technicality.

Soviet Russia's first shipment of gasoline into Japan has started a price war.

SYNOPSIS

Camilla Hoyt, young and beautiful commercial artist, and Peter Anson, a struggling sculptor, meet in an art class and fall in love. She is the adopted daughter of a wealthy family, but is not to share in their fortune when she comes of age. They are faced with the problem of "marriage or career" and Camilla does not want to let Peter down when he has so much promise as a sculptor. At an art school dance, Gus Matson, Peter's roommate, who is jealous of Peter's success, takes Camilla out on the lawn to tell her "something she should know about Peter." Gus tells Camilla Peter is a cheat, that he only wants her money, and that he, Gus, loves her himself. At that moment Peter appears on the scene and knocks Gus flat. On the way home from the party, Camilla tells Peter they are going to do something about their problem. She decides that they are to be married, and until Peter establishes himself, go on living, their separate lives. Above Peter's protests she carries her point. Gus leaves Peter, and Peter and Camilla make plans for their marriage. They decide not to tell Mrs. Hoyt, who wants to see Camilla marry money. They are married quietly, and over their wedding dinner, together, happily talk of their likes and dislikes.

(Now Go On With The Story)

CHAPTER XVII.

Their conversation about the pictures which Camilla had purchased for her room when she was nine years old, had some influence with the decoration of Peter's studio. Of course, he knew that her ideas and preferences had gone modern after the modern manner, but where there was an indigenous foundation of classic appreciation, the new structure above was bound to be influenced largely by it.

He planned and selected accordingly, delighting in his task. In this day of women's emancipation, it seemed a bit incongruous that he was the master adorning the castle for his bride, and particularly in view of their very modern marriage arrangements. It had to be worthy of her, however trivial the cost might be.

Even so, he was rather proud of the finished result, and hoped anxiously that Camilla would like it. Somehow, he was sure she would. He felt so sure about Camilla in every way. Instead of feeling panic at the thought of being married, when he

had always placed that experience far beyond in his career, he felt a sense of peace and security that afforded him a greater hope than he ever had before possible before. After their prolonged wedding dinner at Charm Cottage, they walked through the park and down the avenue to Annex Hall, in the soft twilight of the June twilight. To them the whole world was a changed place. Familiar objects and sights were enhanced by the reflected light of their dreams and hopes and the transformation of love. The fairy tale about wearing, rose-colored glasses is not so fantastic as it may seem. Everyone changes his smoked glasses of gloom for the tinted ones according to his mood and the experiences of the hour. Their transformation of the same objects is amazing as that which the advertisements promise to stout or ageing women.

With hearts beating high for no obvious reason, they talked as casually as though they had just left Professor's Drake's class, to separate at the far side of the campus, but the sky had never been so blue nor the sunset so golden to them as it was upon that day.

To reach the entrance of Annex Hall, they were obliged to turn from the avenue into an alley and cross a paved court. The building really was an old mansion whose spacious, high-windowed rooms had been converted into studio rooms to let, but it joined the more pretentious and newer Craft building with its modern construction that catered to the whims and exacting requirements of more established and successful artists. A corridor connected them, but it was an inflexible and unwritten code that tenants of the annex scorned the more sophisticated entrance of the Craft building, which would lead into the other. It was like being loyal to your caste, or refusing to be a hypocrite.

So Peter and his bride respected the conventions, and entered through the carved and weathered portal of the annex, which proclaimed its magnificent past like an impoverished dowager maintaining her hauteur in rusty silks and faded velvets. They were greeted by the odor that is prevalent in old houses, mixed with the fumes of paints and oils and the more recent odors of food, it being the dinner hour in those one-room apartments whose high doors concealed brave hopes and secret heartaches. One feels this atmosphere of intense conflict in such places, where he knows that into each small niche, aspiring genius has retired to hope and struggle until it opens its doors and strides forth to astonish the world with its achievement; like the brilliant butterfly emerging from its chrysalis.

Perhaps each of them sensed this atmosphere of retirement into obscurity, for they were silent while they climbed the old carved stairway and followed the dimly lighted corridor to the rear. But their silence was not oppressive with doubts and fears. They were not retiring into obscurity, together, to work and hope side by side and emerge triumphant together? In their youthful imagination, they already walked the avenue of fame with laurel wreaths upon their brows and passed beneath the arch of triumph together.

Peter broke their silence with awkward bluntness as he stopped before

a door on which were tacked small metal digits to form the number 37. "Well, here we are, Mrs. Anson. Number twenty-seven, Struggle Avenue, Hope Annex." He drew a key ring from his pocket and fitted one of the keys into the old-fashioned lock below a white porcelain doorknob. He pushed the door open and stood aside for her to enter.

Camilla gave a room a quick glance and then looked at Peter. He was alarmed. "What's the matter, dear?"

"Nothing at all," she smiled. "But I was just thinking, Peter, darling, about that old custom of carrying the bride over the threshold of the new home, so that happiness and prosperity will dwell there. This may be the only home we'll have for quite a long time."

He had her in his arms before she could finish, holding her as lightly as a river supports a leaf, as he stepped into the room with her. He turned and closed the door behind them with his foot, then kissed her and set her down gently in the center of the room.

Camilla laughed happily and looked about her slowly. He waited anxiously for her verdict.

Finally, she gave a little gasp of delight. "Why, Peter, it's beautiful. I had no idea that you could—but where did you get all of these lovely things, dear?" Her enthusiasm pleased him immensely.

"It would take a while to explain the history of everything, but you can get it all gradually. For instance—well, what do you like best?" She glanced around the room again, quickly. "I am most curious about that modelled group in the window alcove. Where did you get that—its marvellous!"

"That overflowed the measure of his delight. 'That, my dear, is my wedding gift to you. How did you know?'"

"You made that?" with astonishment.

"And you inspired it."

She crossed the room to examine it more closely. Her fingers touched the statue reverently. The principal figure was a woman with a shawl over her head, away; the expression of her face and the posture of her body portraying alike a wistful weariness, a timid aggressiveness, a fearful hope. Her face was lifted up toward a distant object that was vaguely obscure. But each of her hands clasped the hand of a child—a boy on one side and a girl on the other, who leaned against her and seemed to draw back in fear. But their faces were lifted toward that invisible object in the distance. The clothing of all three was ill-fitting and clumsy, and there lay a knobby bundle close beside them on the plinth at their feet.

Camilla turned to Peter reverently. "You have done this beautiful thing just for me, darling?"

"Do you like it?" taking her in his arms.

"I love it next to you, because it is part of yourself," she told him, with wonder in her voice. "If you can do that for me—you can do anything. I have no fear for us, now."

He dismissed her praise with a happy confusion. "You are a prejudiced critic. I can see that. But it makes me happy just the same, and gives me hope. Remember what you said that night when we found love together, about the brave souls who arrive at Ellis Island with shawls on their heads and hope in their hearts. I began to work on this for you soon afterward. Then when we planned later to be married so soon, I saved it for a surprise on our wedding day."

"It's perfect, Peter, and so—right isn't it? It expresses us, exactly. Oh, I can't put into words what I feel, dear, but you have it all there; every emotion and dream and fear that a brave adventure brings."

"Your interpretation is even wider than my own," he admired thoughtfully. "You see, already, you have inspired the best thing I have done and have doubled its meaning at the first glance. If I expected to succeed without you, what shall I do with you?"

"Become very famous, of course," she told him confidently, and moved nearer into his embrace.

"You are so sweet," he murmured, holding her close.

Camilla reached her arms up around his neck and their eyes plunged deep into each other's, but the mysteries which had limited their vision until that hour.

"Peter, my husband," his voice whispered.

"Camilla, my wife," his voice trembled.

(To Be Continued.)

"My last five secretaries left me in tears."

"Really. Do you cry much?"

Organize Reserve Force

Women in London Will Be Available in Emergencies

A women's reserve force of 2,000 to serve in local or national emergencies is being formed in London by Miss Mary Allen, until her resignation some months ago celebrated as the commandant of the women's force attached to the Metropolitan Police.

Commandant Allen raised an unofficial body of women for street patrol and other duties during the war.

Women who own aeroplanes or motor cars are especially welcomed to the new body. One particular course of instruction for the recruits is the use of gas masks and methods of dealing with victims of gas poisoning.

"I do not wish to particularize regarding an emergency," Miss Allen said, "but over since the general strike people have approached me regarding the formation of such an organization. It is not intended to be a military body, but the officers will hold military rank. All the members will wear a uniform."

This uniform consists of a long blue, double-breasted coat with leather belts, and berets. Recruits will be eligible from the age of 16 up.

New Society Advocates World Police Force

Its Main Object Would Be To Maintain Peace

To advocate a world police force to maintain peace, a new international society has just been formed in London. The president is George N. Barnes and the honorable treasurer Lord Davies of Llandnam. The society is known as the New Commonwealth. It advocates, in addition to an international police force, an international tribunal empowered to deal with all disputes threatening the peace of the world which do not come at present within the scope of the permanent court of international justice.

Relief Gardens in England

In the towns and villages of England and Wales there are more than 1,000,000 allotment holders producing, it has been estimated, \$50,000,000 worth of vegetables and fruits every year on their small plots provided for them by the municipalities. Probably half these men are otherwise unemployed.

There are ten women in the United States who hold licenses showing that they know how to repack and repair parachutes.

"Pelican sheen" is a new dress goods shade in Paris.

New Household Pet

Naturalist Says People Would Enjoy Watching Praying Mantis

The praying mantis, a slender insect with long thin legs, may soon become an American household pet, according to Dr. Walter F. Shelton, of American University.

In an article published by the American Nature Association, Dr. Shelton points out the praying mantis has for centuries been held in reverence by Oriental peasants, French farmers and the Hottentots.

The insect derives its name from the position of the two forelegs which it folds together compactly to resemble an attitude of prayer.

"If you want to enjoy this insect at its best," Dr. Shelton said, "be on the lookout for an egg-case or two this winter. Do not bring them into the warm house as they will hatch out before you can find food for the infants. A rectangular aquarium with a screen top makes a fine home."

"As soon as the mantis reach any considerable size you will have to provide separate apartments for each one, as they are cannibalistic when hungry. Any live insects not too large for them to handle will make satisfactory food."

"My personal experience leads me to believe they will give you many hours of pleasure and much amusement."

Little Helps For This Week

"My brethren count it all joy when ye fall into divers temptations, knowing this, that the trying of your faith worketh patience."—James 1:2, 3.

For patience when the rough winds blow.

For patience when our hopes are fading.

When visible things all backward go, And nowhere seems the power of aid.

God still enfolds them with His wondrous hand And leads them surely to the Fatherland.

—N. L. Forthingham.

We have need of patience with others as well as ourselves, with those below and those above us, and with our own equals, with those who love us and with those who love us not, for the greatest things and for the least, against sudden inroads of trouble and under our daily burdens, disappointment, or the breaking of the heart; in the weariness of the body or the wearing of the soul. We need it in the everyday wants or the aching of sickness, in bereavement, losses or in heaviness of heart. In all these things patience is the grace of God whereby we endure evil for the love of God.—E. B. Pusey.

An Unassuming Magnate

Sir Herbert Austin Might Easily Be Taken For One Of His Employees

Sir Herbert Austin, the motor magnate, will probably stimulate controversy with his plea that, some system should be evolved that will enable women to be taken out of industry, thus helping to solve the unemployment problem for men. Sir Herbert Austin, though one of the outstanding industrialists in this country, is also one of the most unassuming. His principal hobby is to do what he accomplishes mainly with a stub of a pencil. It can do more with this stub of pencil in the way of designing pieces of automobiles than a whole staff of draughtsmen equipped with boxes of drawing instruments. Anyone visiting his factory, who did not know him by sight, might mistake him, in his old coat, for one of the least-important employees. This erroneous impression would be confirmed by a casual chat, for Sir Herbert Austin, like his fellow-manufacturer Sir William Morris, is entirely devoid of "slide"—London Correspondent Ottawa Journal.

No Cause For Pessimism

West Will Again See Demand For Farm Products

Western Canada, with its large yield of farm products, and its possibilities of vastly greater production, should not be discouraged about its future. The world managed to consume the production of vast areas of new lands during the past sixty years without any apparent indigestion until the present depression came along. A restoration of good times would immediately see improved demand for farm products. And there are no great new lands similar to Western Canada, Argentina and Australia, still to be opened for agricultural development.—Calgary Herald.

Customer: "Have you any good pork?"

Butcher: "Good pork! Say, I've got something that will make better chicken salad than any lamb you could buy."

Devil's Food Layer Cake

1/2 cup butter 1/2 teaspoon salt
1 1/2 cups sugar 1 teaspoon
3 eggs Magic Baking
1 cup milk Powder
2 1/2 cups pastry 1 teaspoon va-
lentine or 2 cups vanilla extract
and 3 table- spoon of level
spoons of level flour) melted

Green butter thoroughly add sugar slowly. Add beaten yolks one by one. Add flour sifted with baking powder and salt, alternately with milk; add vanilla and melted chocolate. Fold in stiffly beaten egg whites. Put into 9x12 inch cake tin and bake in moderate oven at 350° F. about 30 minutes. When cool, put together and cover thickly with Chocolate or White Icing (see types are in the Magic Cook Book).

Miss Gertrude Dutton
tells why she makes her

Devil's Food Layer Cake

with Magic Baking Powder

"I know from experience," says the cookery expert of Western Home Monthly, "that Magic makes most baked dishes look and taste better. Its uniform leavening quality gives dependable baking results."

Miss Dutton's praise of Magic is seconded by the majority of dietitians and cookery experts throughout the Dominion. They use Magic exclusively because they know it is pure, and always uniform.

Canadian housewives, too, prefer Magic. In fact, Magic outsells all other baking powders combined.

For luscious layer cakes, light, tender biscuits, delicious pastry—follow Miss Dutton's advice. Use Magic Baking Powder.

FREE COOK BOOK—When you bake at home, the new Magic Cook Book will give you dozens of recipes for delicious baked goods. Write to Standard Brands Ltd., Free Are. and Liberty St., Toronto, Ontario.

MAGIC BAKING POWDER

Contains no alum. This extra-quick powder is in every granulation. It is pure and its action is rapid. It is the best powder in the world for home use. It is the best powder in the world for home use. It is the best powder in the world for home use.

Alberta's Junior Farm Clubs
Junior farm club work in Alberta has reached its highest peak this year, with 376 clubs in operation, having over 2,800 members. In 1932 there were 2,200 members. Club clubs are coming into prominence, one at Olds having a membership of 100, one of the largest in Canada. There are 116 seed grain clubs, and 19 calf clubs.

Quick Relief Now From Neuralgia

1. JACK, I'M TO SEE CLARK ABOUT THAT BIG ORDER IN 40 MINUTES AND I HAVE TERRIBLE NEURITIS... WHAT CAN I DO?

2. LATER
WELL, JACK, I GOT THE ORDER! YES, FELT BET AS A RIDDLE... YOU BET, I'LL ALWAYS GET ASPIRIN WHEN I WANT QUICK RELIEF FROM PAIN.

Real ASPIRIN Starts Taking Hold in Few Minutes

Now comes amazingly quick relief from headaches, rheumatism, neuritis, neuralgia... the fastest relief, if it is said, get diagnosed.

These results are due to a scientific discovery by which an Aspirin Tablet begins to dissolve, or disintegrate, in the amazing space of two seconds after the Aspirin Tablet is placed in the mouth. And hence to start "taking hold" in a few minutes after taking.

The illustration of the glass, here, tells the story. An Aspirin Tablet starts to disintegrate almost instantly you swallow it. After that it is ready to go to work almost instantly.

When you buy, though, be on guard against substitutes. To be sure you get ASPIRIN's quick relief, be sure the name Bayer in the form of a cross is on every tablet of Aspirin.

WHY ASPIRIN WORKS SO FAST

Drop one Aspirin Tablet in a glass of water. Note that BIPOLAR touches bottom. It has started to disintegrate.

What it does in this glass it does in your stomach.

Items for this column are always appreciated.

Don't overlook that Gracie Field's premiere at Garstairs on Nov. 17-18.

Louis Overby has again been engaged as icemaker and caretaker at the curling rink.

A. P. Stafford of Mossleigh renewed acquaintances in town today (Thursday).

We understand that Guy Gazeley is starting a general store at Water Valley.

Lewis Lennon is able to be up and around again after an attack of the flu.

Only two more weeks to take advantage of the ten per cent discount on your Village Xmas cards.

We have a large assortment of birthday cards at the Chronicle Stationery Store.

Have your Christmas cards printed at the Chronicle office. You save the peddlers profit.

Mrs. Hume of Cayley spent the week-end the guest of Mrs. P. H. Fleming.

Les Spivey has installed two of the new Spartan radios, one for Jno. Zanni and one for Geo. Lem.

Have your personal greeting cards printed at the Chronicle office and save money.

George Hogan of Edmonton was a week-end guest at the home of Dr. and Mrs. S. H. McClelland.

D. Tweedie of Lethbridge, former principal of the Crossfield school, spent the week-end in town.

Mr. and Mrs. Scott, Mr. and Mrs. Ben Mabley came over from Delacour to attend the dance on Friday.

S. J. Heggie of Hanna was the guest of Mr. and Mrs. G. Y. McLean.

Miss Myrtle Metherall and Miss Mildred Hyde of Edmonton spent the week-end at their respective homes here.

Fred Adams who was operated on for hernia at the General hospital, Calgary, is getting along nicely.

Keep in mind the big hop in the East Community Hall on Friday, Nov. 24. Robertson and his Foot-hill Billies will furnish the music.

Gordon Young came up from Acadalry to attend the dance on Friday, and went on to spend the holiday with his parents at Trochu.

The Ladies Aid of the United Church Hall on Tuesday, Nov. 21, from 5.30 to 8 o'clock. A good meal for 25c. Children 15c. Don't miss it.

Archie Switzer left for Saturday for Toronto where he will reside indefinitely. Mr. Switzer left Calgary for the east on Saturday with a train load of cattle.

Laughing Dick Nichols has moved into the McIntyre residence, and he and Hughie will batch during the winter months, which no doubt will be long enough.

J. P. Winning of Hanna came over to attend the Armistice dance on Friday night and spent the holiday in town renewing acquaintances with his many friends here and taking part in the Legion activities.

A very successful court wheel drive was held in the Masonic Hall on Wednesday evening, under the auspices of the Rebelek Lodge. Sixteen tables were played and the following were the prize winners:

Ladies' first, Mrs. E. Devins; second, Mrs. (Dr.) Williams; gent's first, Mr. Walter Major; second, Mr. Glen Williams.

The fortnightly five hundred card parties have been resumed at Tany-Bryn school and on Wednesday of last week eleven tables were in play. Prizes were won by Miss Martha Christiaansen and Mr. J. McCordie.

Madden Notes

"Flannel Feet" the cop is leaving our midst this week.

A dance will be held in the Beaver Dam Hall on Friday, Nov. 17th. Music by the Borbridge orchestra.

Tom Tidball has a mixed car of salt arriving on the next train. See his advertisement in this issue.

Marles Bros. prominent farmers and ranchers have purchased 100 head of stock cows from Angus Robertson of the A C Ranch.

A demonstration of the Massey-Harris Hammer Mill will be given at Madden on Friday, Nov. 17th, at 1.30 o'clock.

The School Corner

(Edited by the School Reporter)

A new clock has been placed in the high room and it certainly is an improvement.

Grade XII is just going into graphs of one variable. What lovely pictures they are making. We wonder if they could not do as well by laying an angle worm dipped in ink on the paper.

The first November basketball game was played Monday at recess. From all appearances it was a rugby game and the team should certainly arrange for a game with the Calgary Altoniah junior champions.

The chemistry experiments are causing a great deal of excitement lately. Observations were made from around a corner, a safe distance from the apparatus.

Students from the other rooms curiously peering in the door of room four and retreating hastily at the cannon like report.

Neil Launt wondering why he was not warned by the command, "Hands up".

The ceiling plentifully spattered with water—the result of the blow-out.

Mr. Johnston mopping the water off himself after the experiment.

NOTICE TO CREDITORS

IN THE ESTATE OF WILLIAM STAUFFER, late of the Town of Crossfield, in the Province of Alberta, Farmer, Deceased.

A Foundation for Goodwill

There is a very solid foundation for the goodwill that prevails towards United Grain Growers wherever the sign of this company appears on an elevator throughout Western Canada.

It rests on many years of useful service, and a long demonstration that this company not only desires to take care of the interests of its farmer customers, but it has the organization, the equipment, the resources and the experience which enable it to do so.

Whether in selling grain or in buying farm supplies it is sound business to deal with this Company.
